Common Ancestors

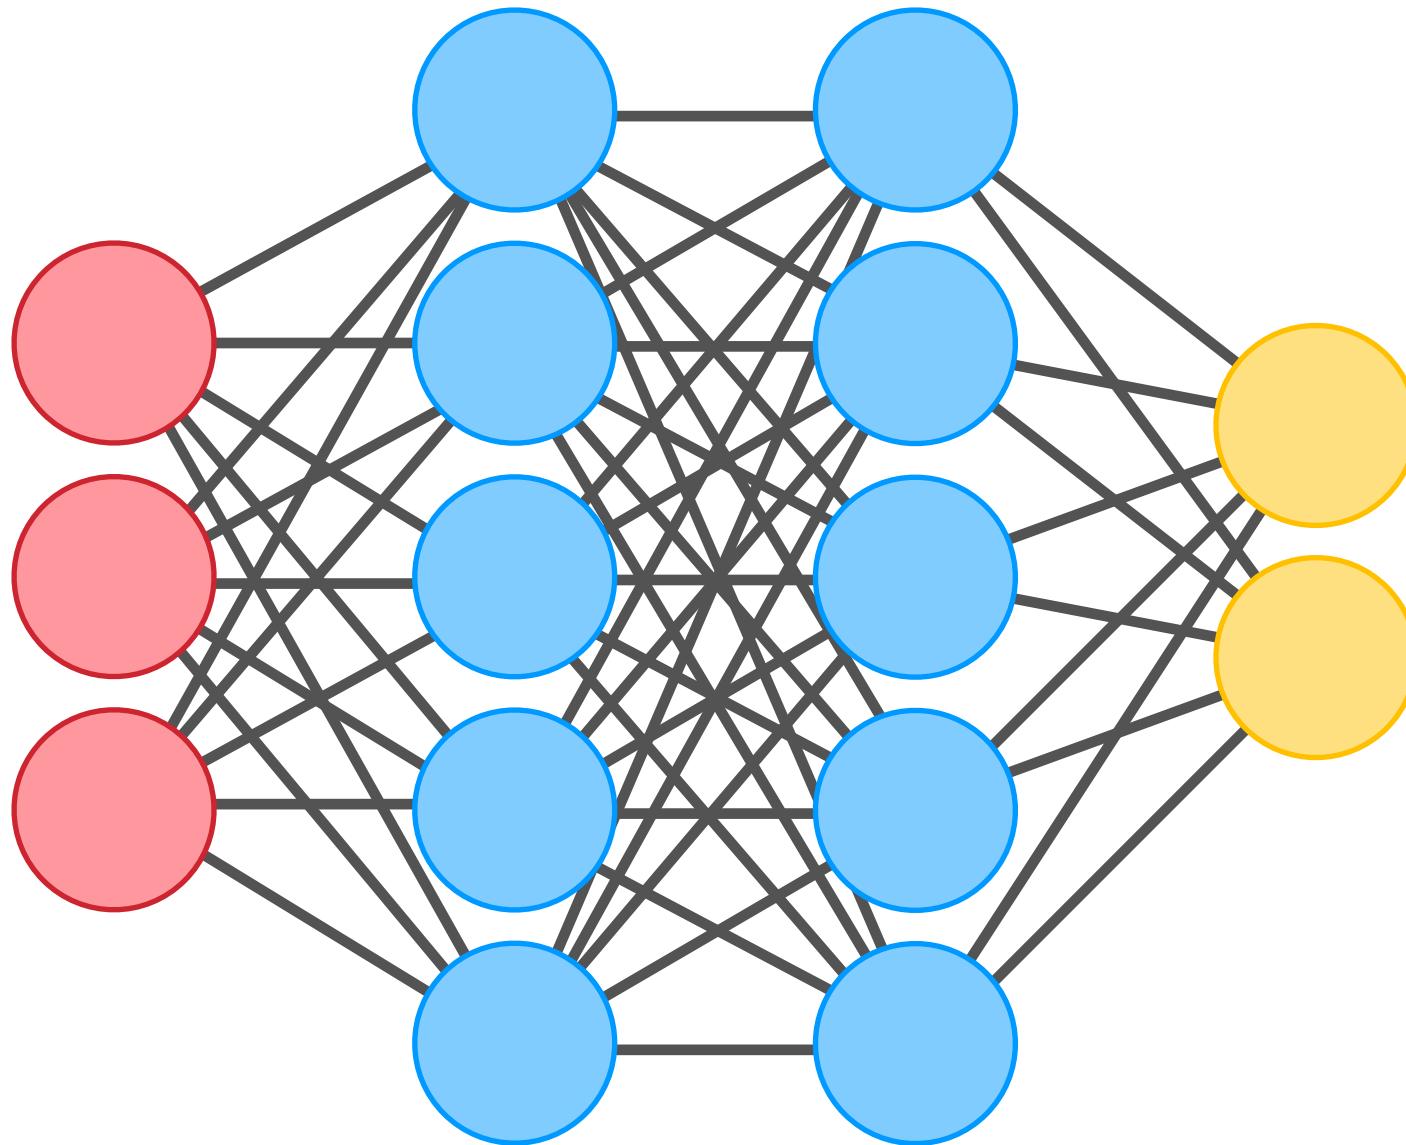

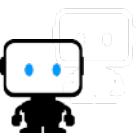

of 69 charcoal iron furnaces in the Hanging Rock Iron Region. Extending more than 100 miles from Logan, Ohio to Savage, Kentucky this area contained all the materials necessary to produce high grade iron. The industry flourished for over 100 years in mid-nineteenth century during which time the area was one of the leading iron producing centers of the world. The charcoal iron industry was responsible for the rapid development of southern Ohio and the surrounding areas. The Hanging Rock Iron Region forms an important chapter in the industrial history of the Buckeye State.

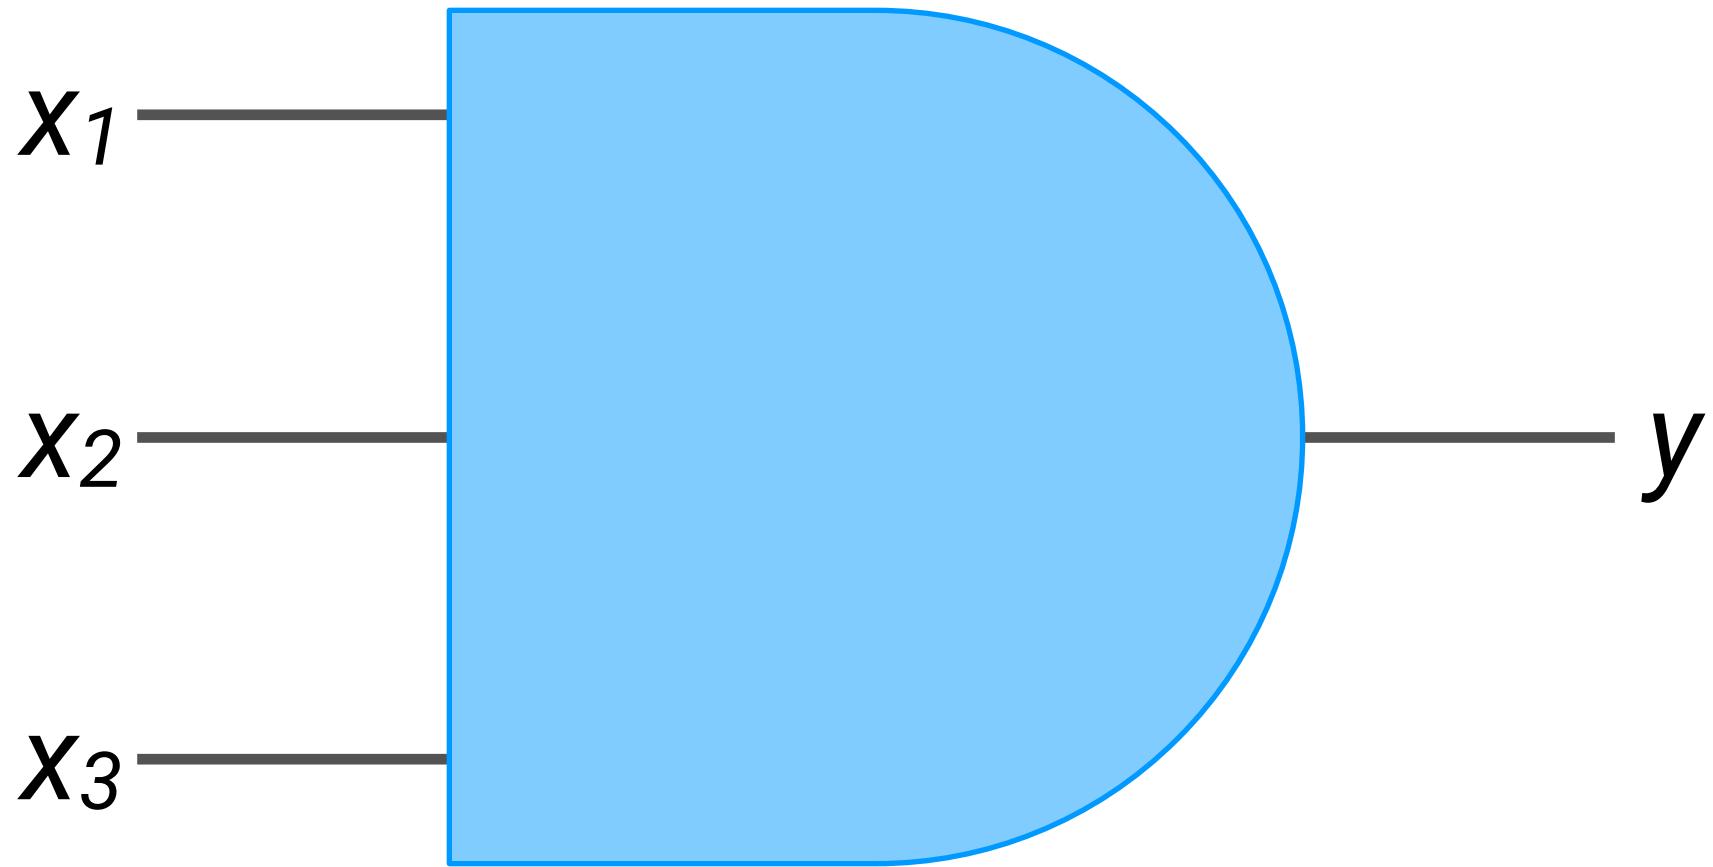

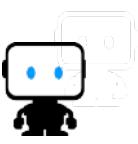

Recognizing Runes

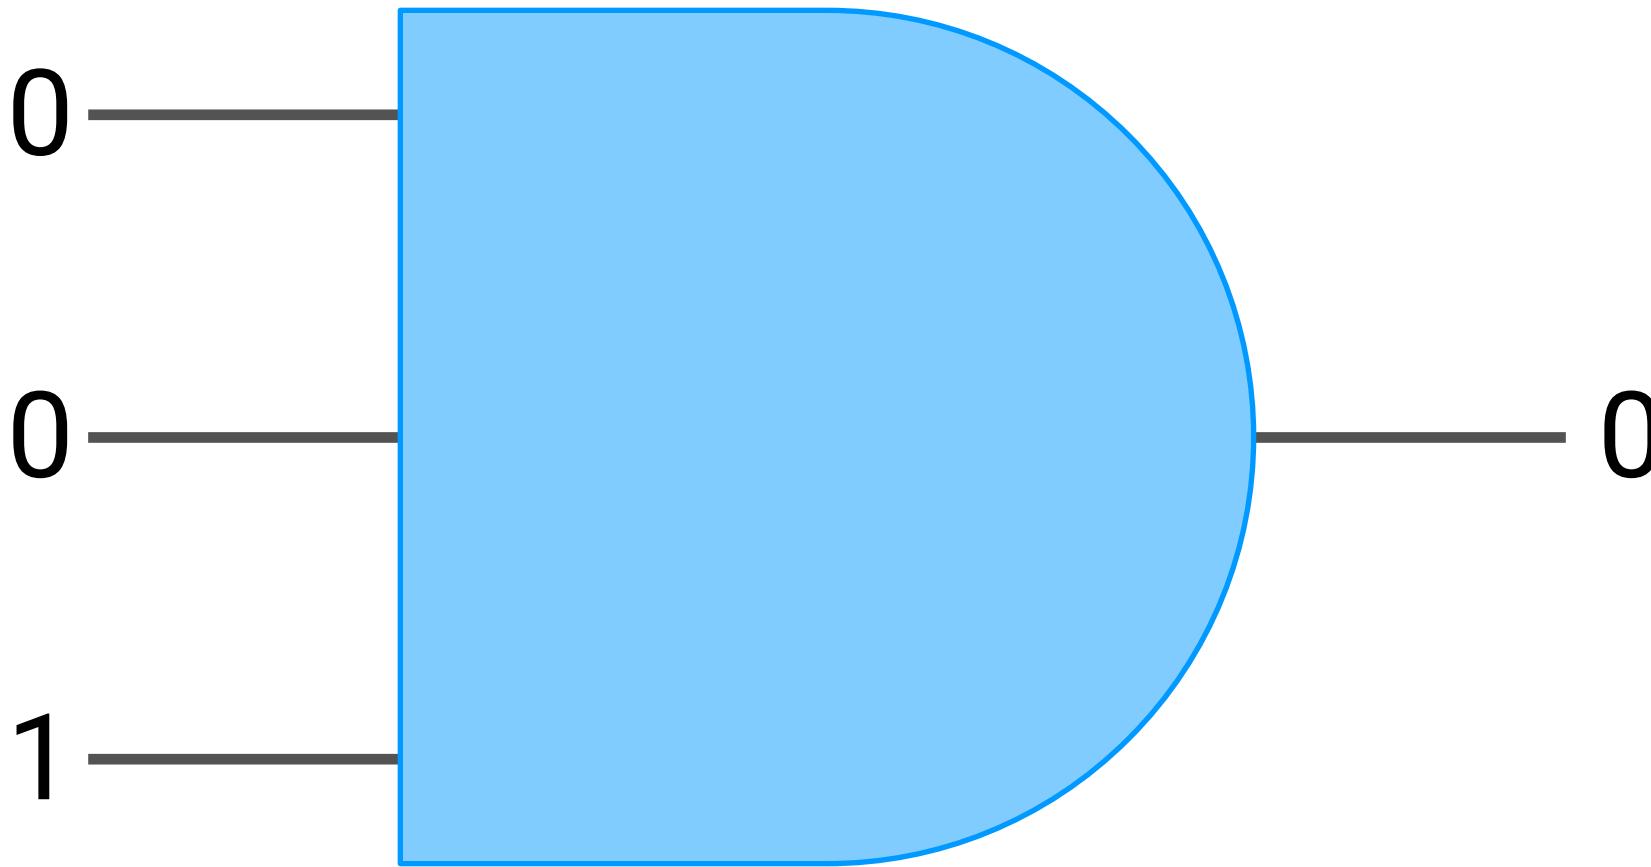

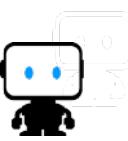

Neural Networks

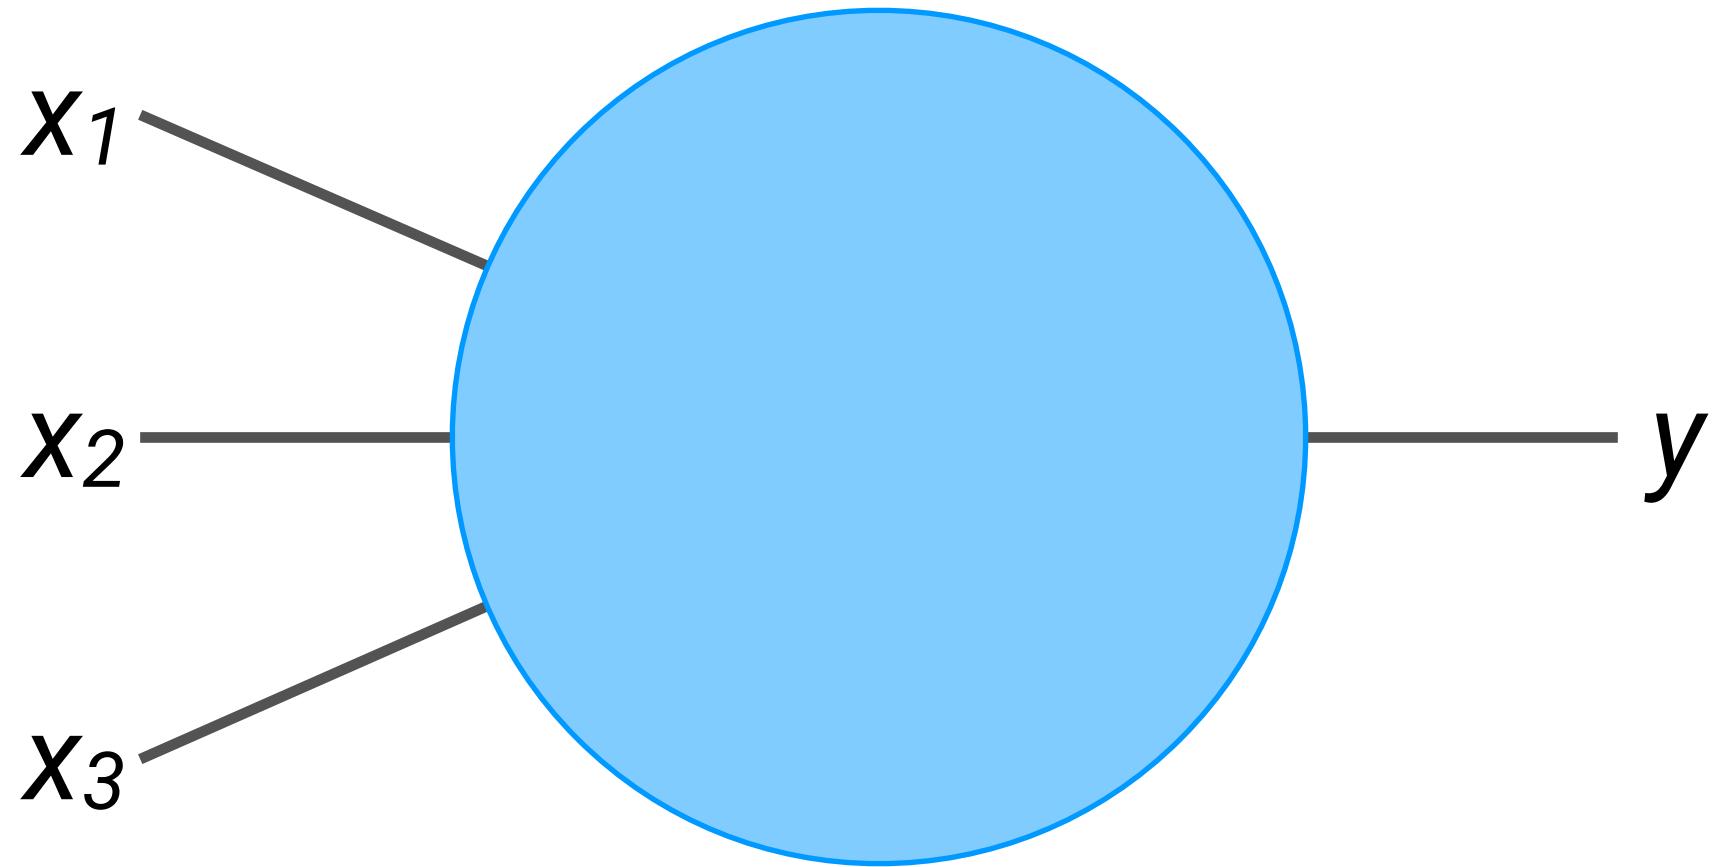

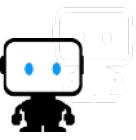

Logic Gates

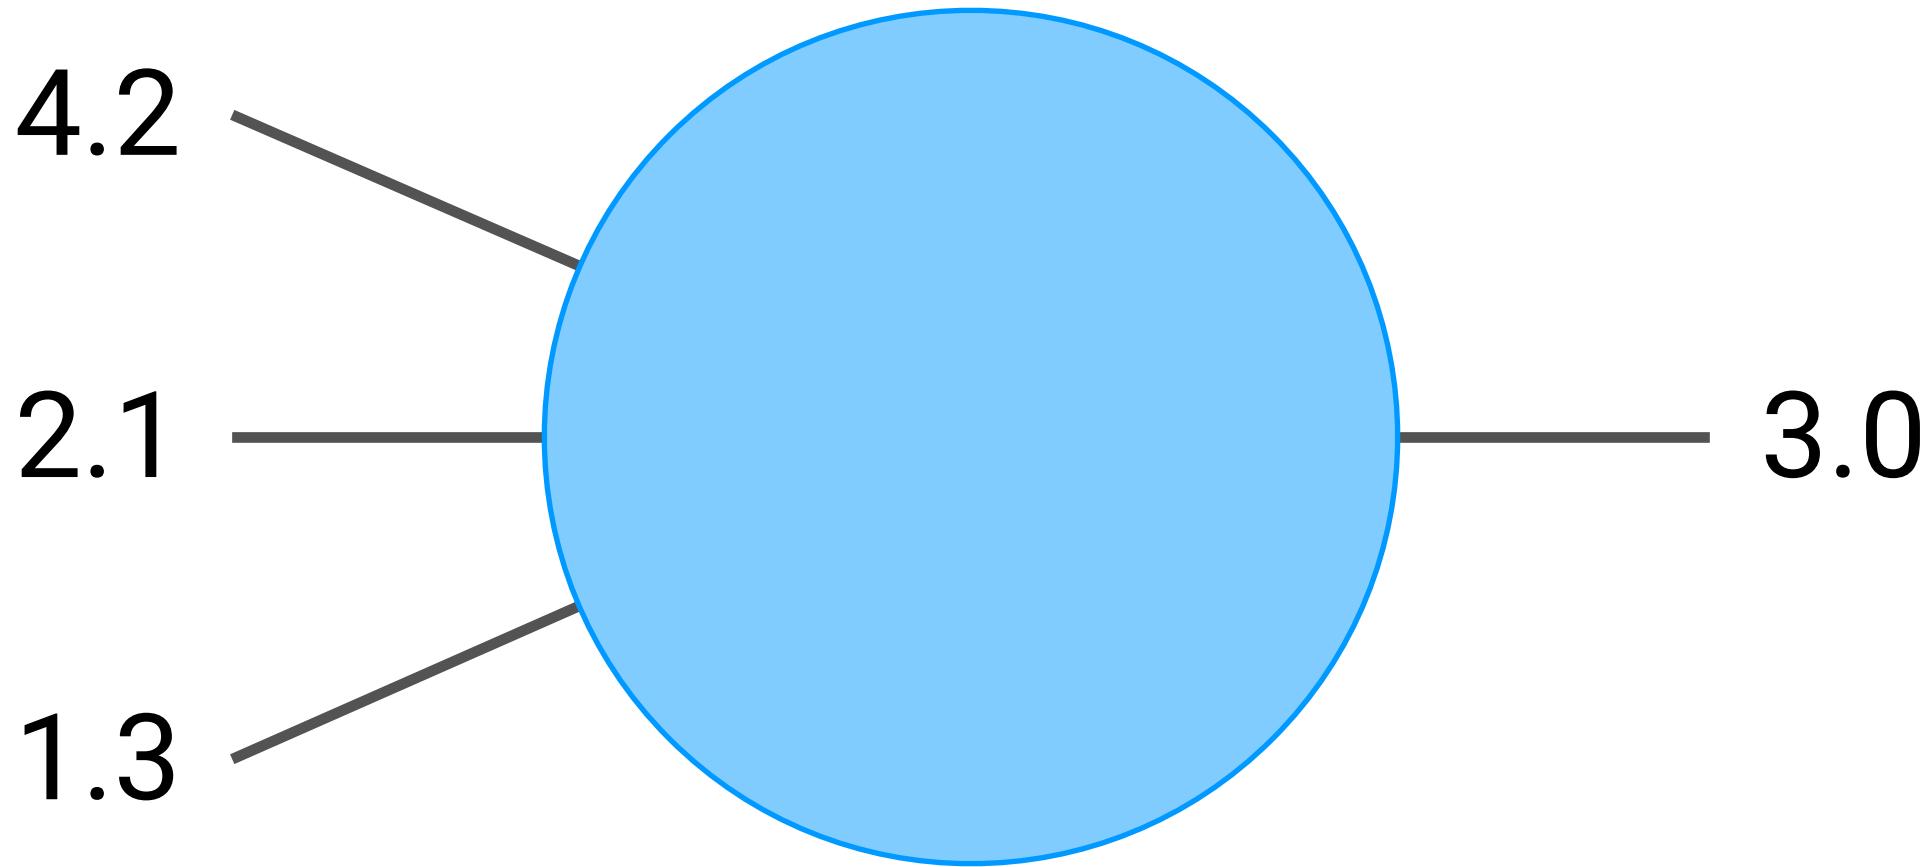

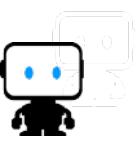

Logic Gates with Actual Numbers

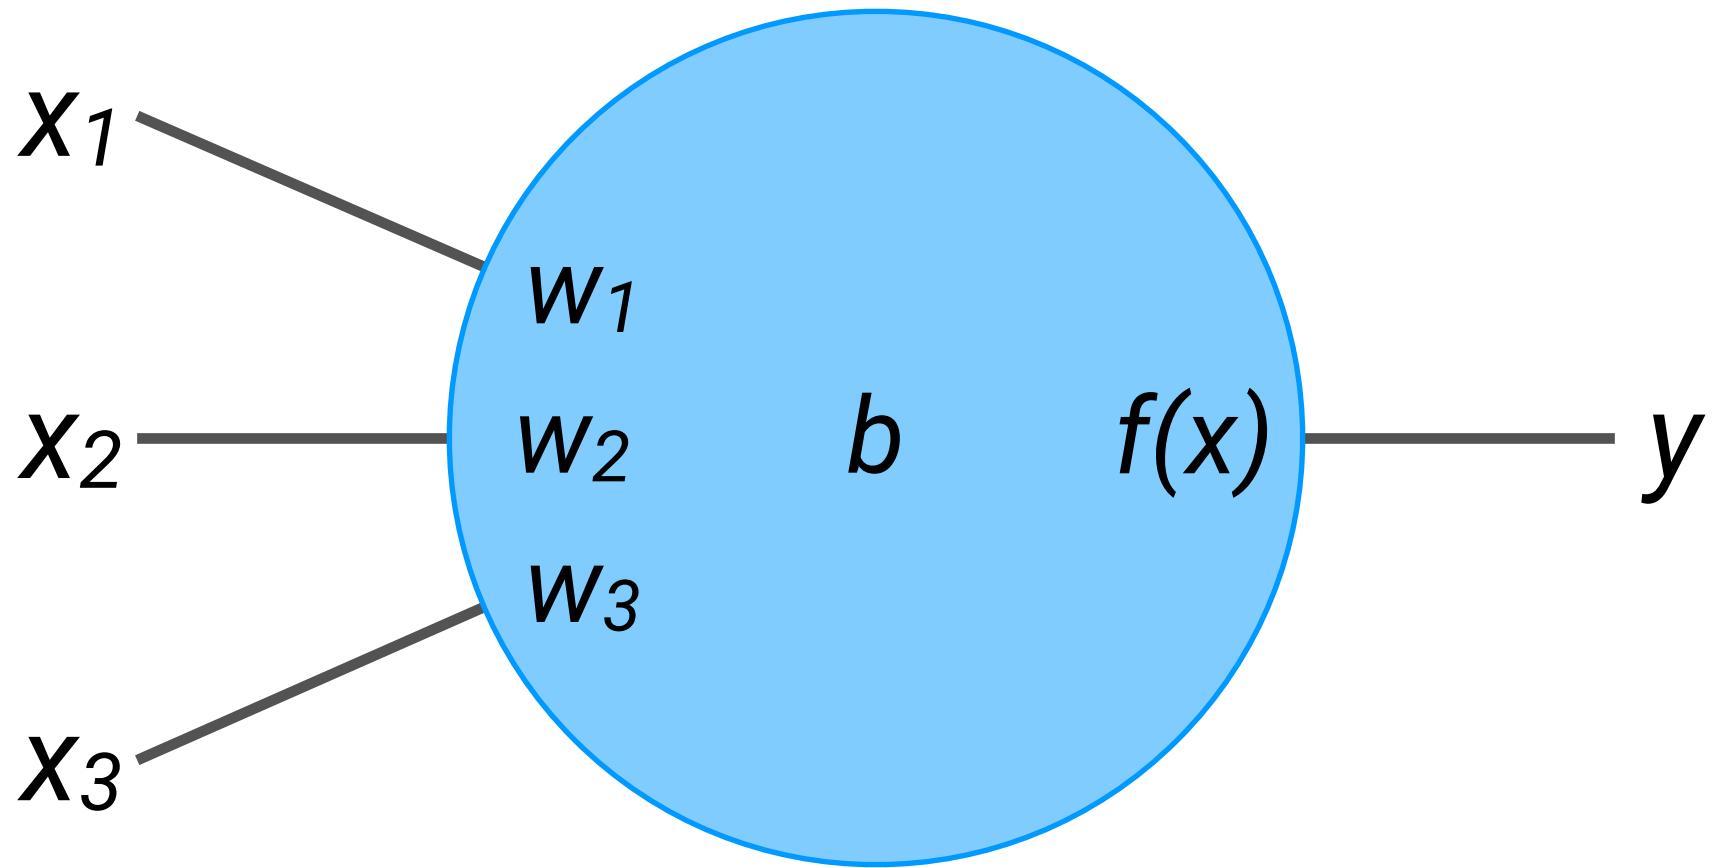

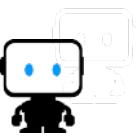

Neurons

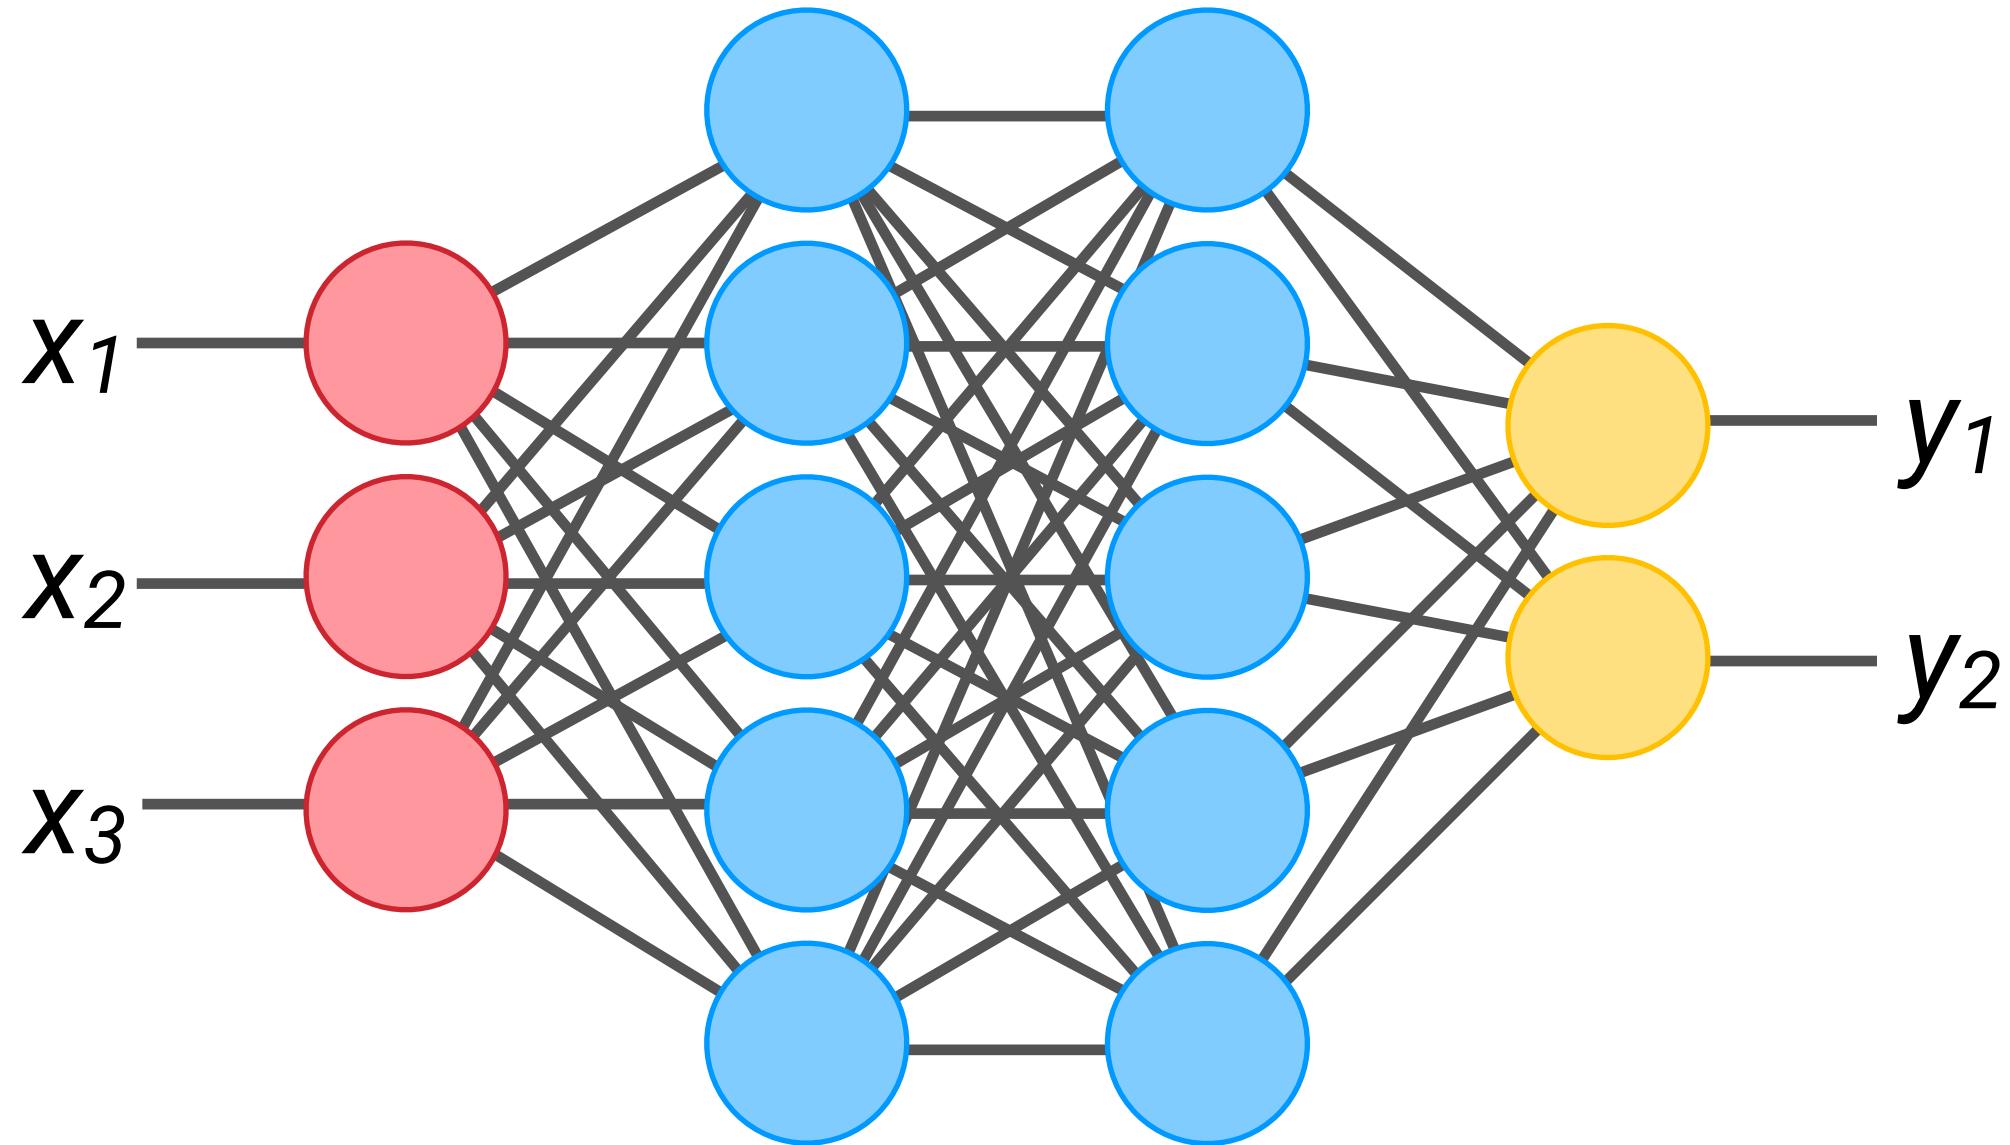

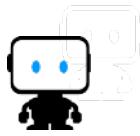

Neurons with Actual Numbers

Inside a Neuron

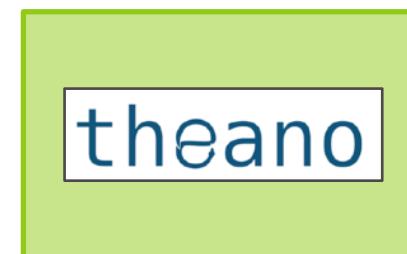

Neural Networks

Keras

```
# configure the neural network
model = Sequential()
model.add(Dense(24, input_shape=(2, ), activation='relu'))
model.add(Dense(2, activation='softmax'))

# compile the model
model.compile(loss='categorical_crossentropy', optimizer='adam', metrics=[ 'accuracy'])

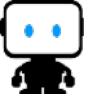

# train it
model.fit(X_train, Y_train, batch_size=32, epochs=5, verbose=1)
```

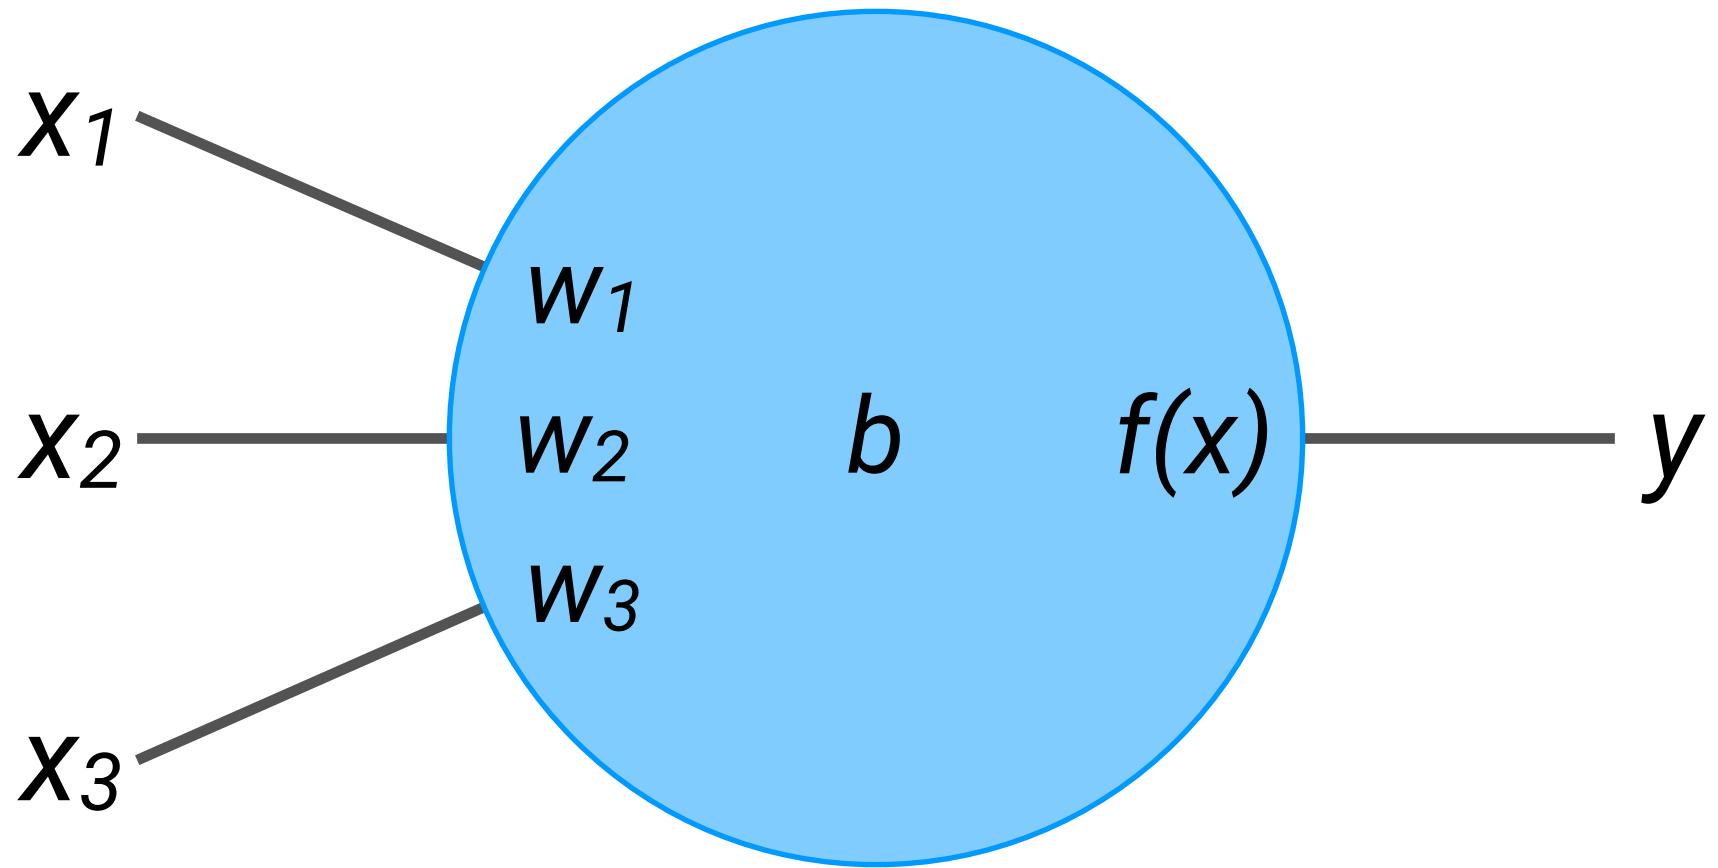

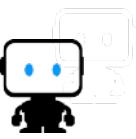

Exercise 1

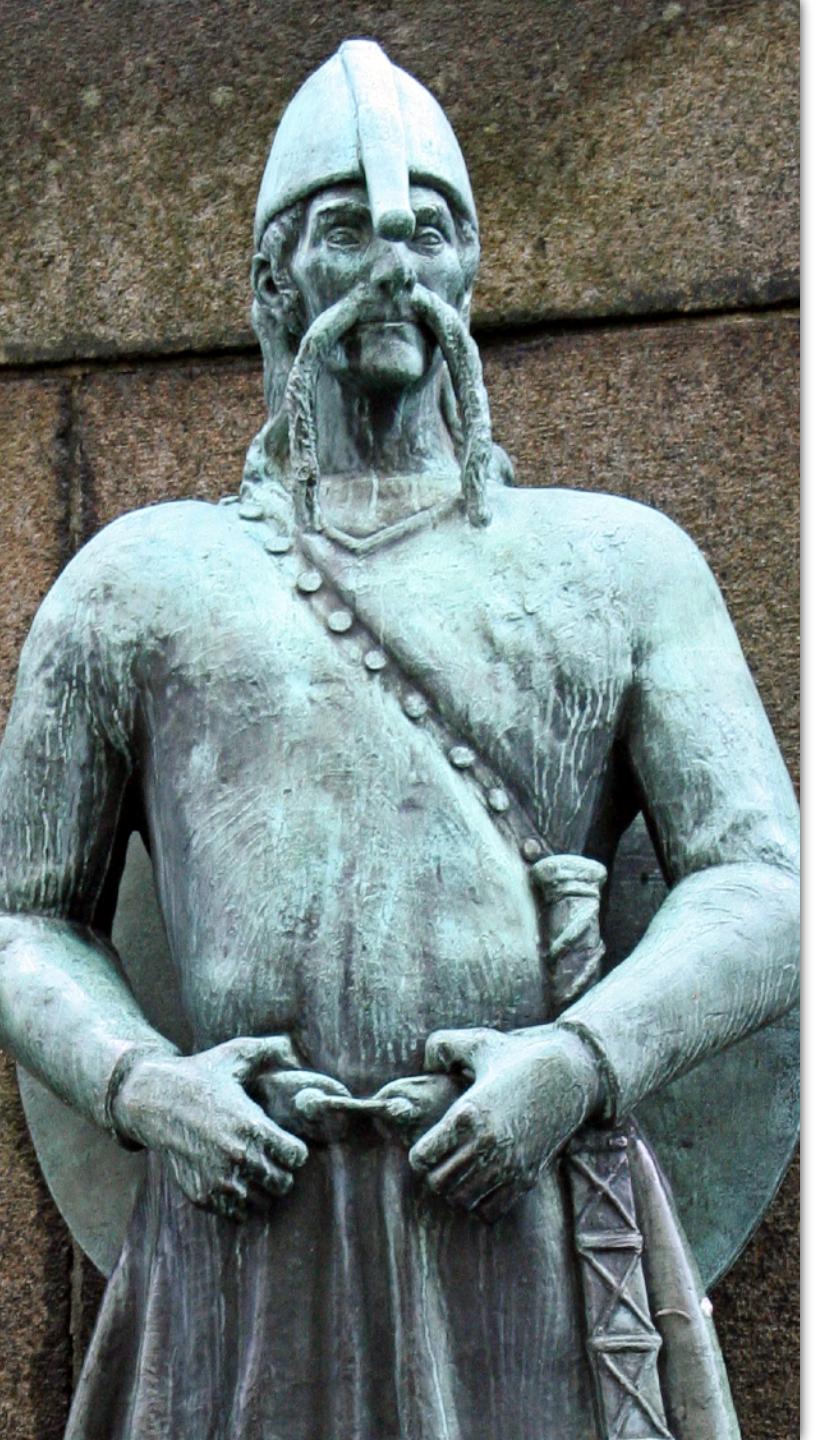

Logic Gates the Hard Way

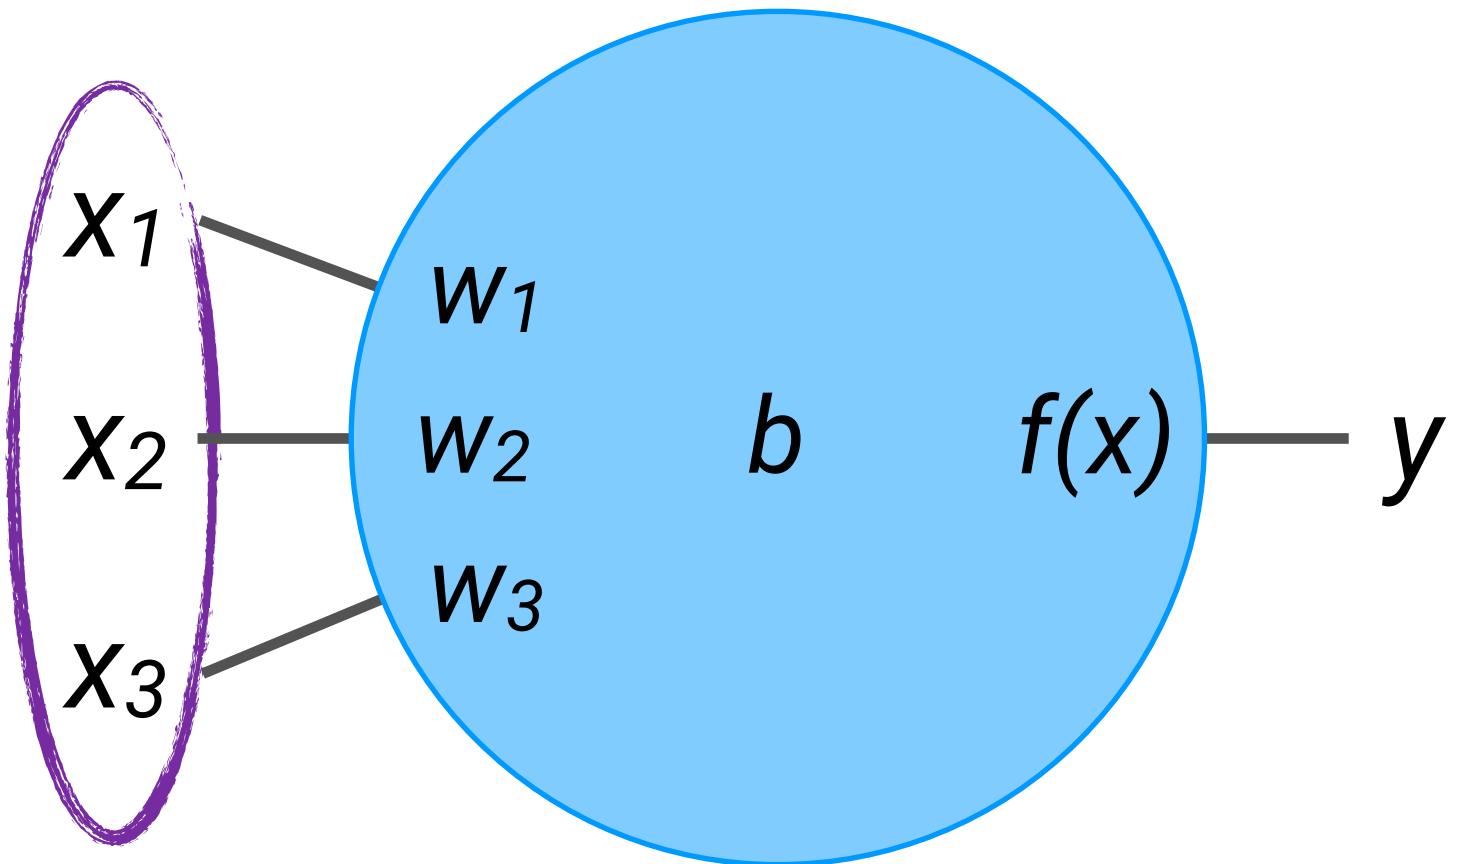

**[https://github.com/guyroyse/
deep-learning-like-a-viking](https://github.com/guyroyse/deep-learning-like-a-viking)**

Inside a Neuron

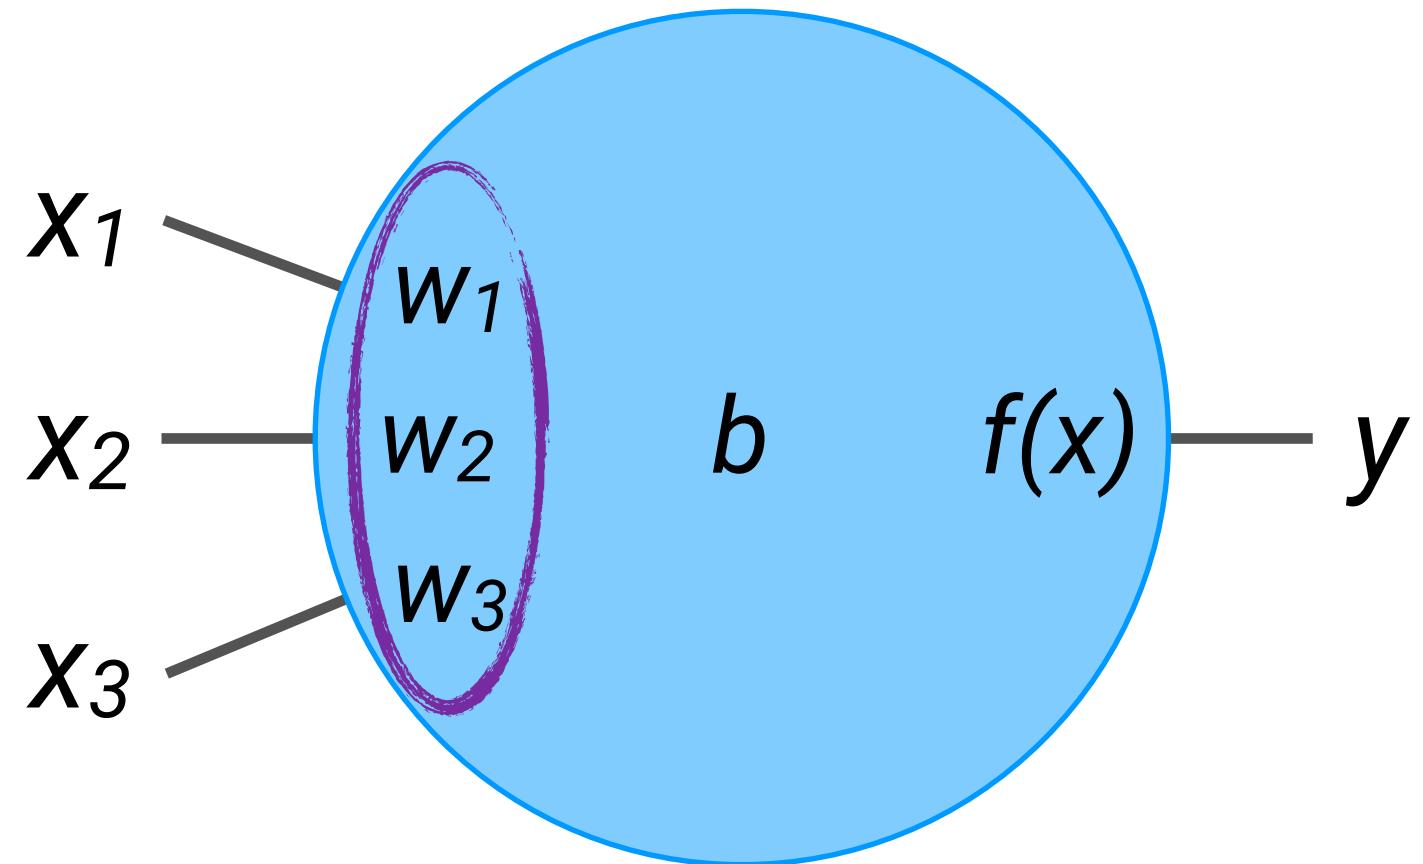

Inputs

The values coming into the neuron.

Weights

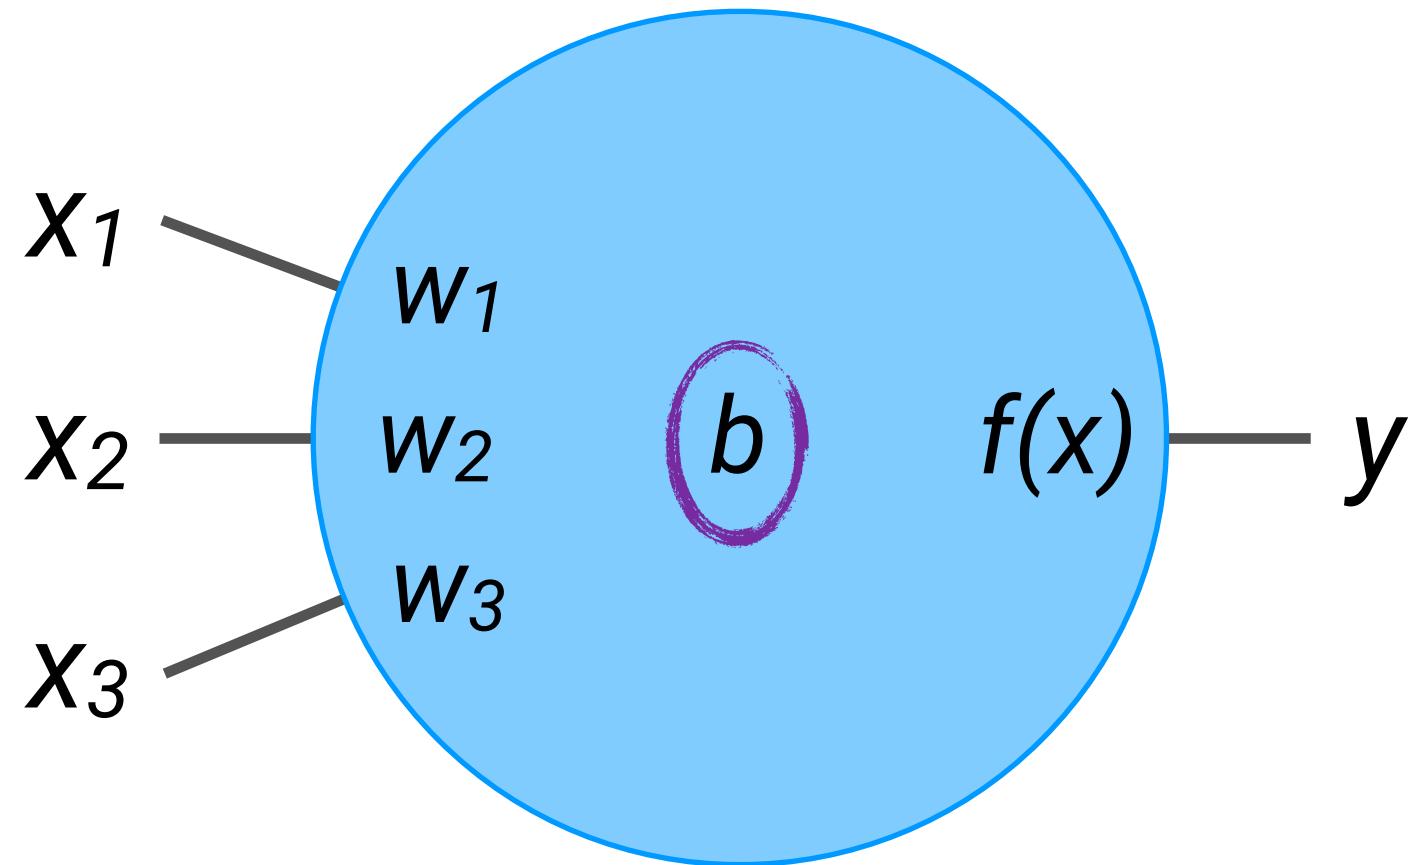

Makes an input more or less important.

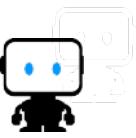

Bias

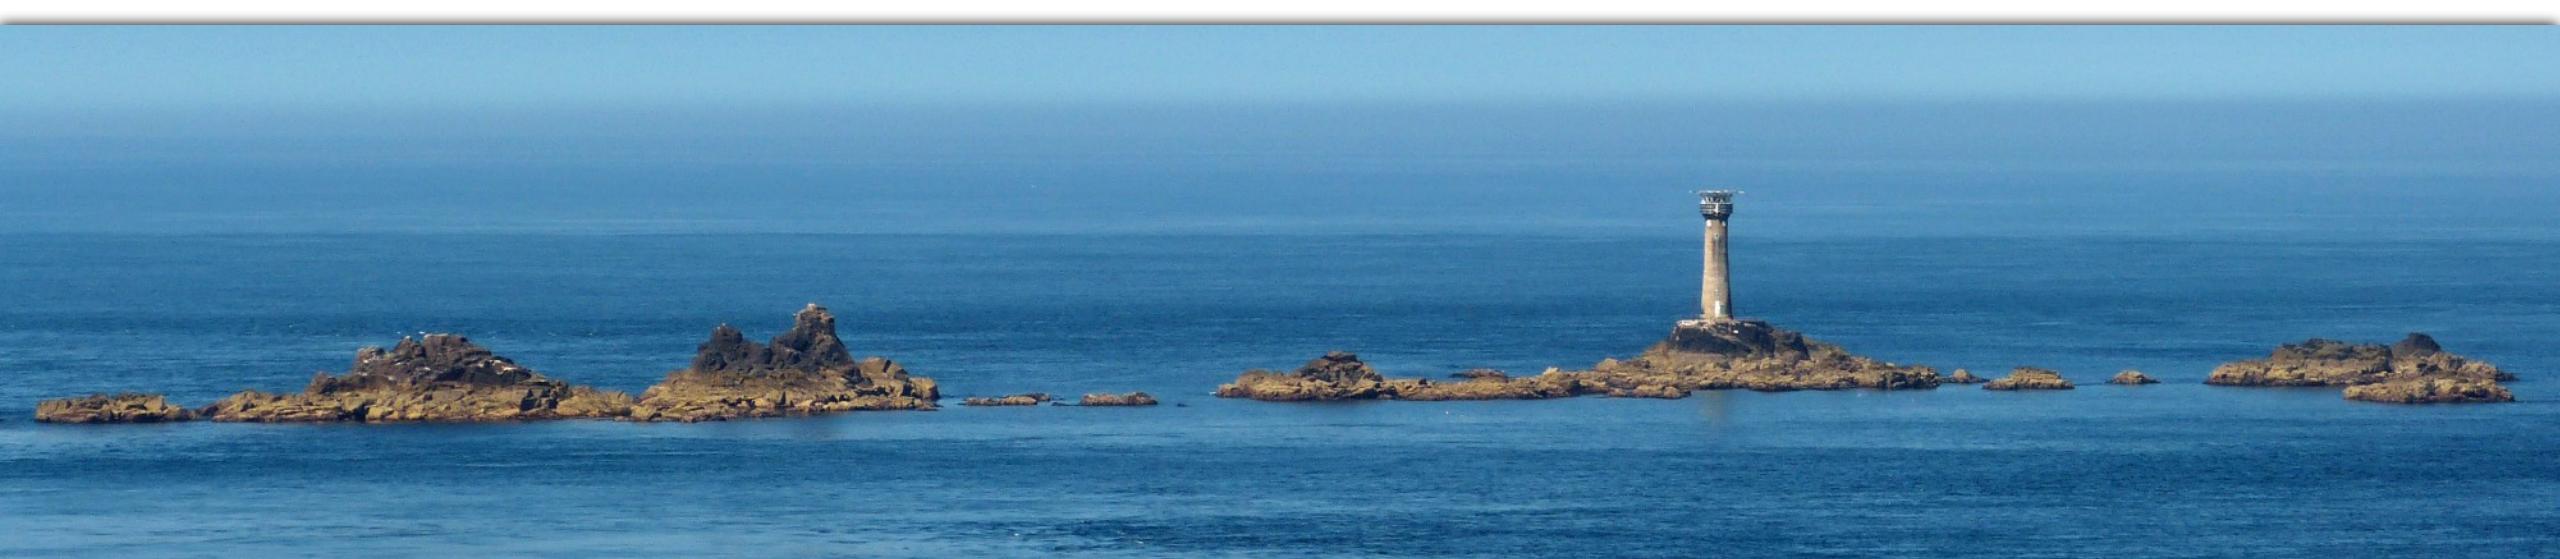

Makes the sum of the inputs more or less important.

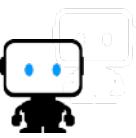

The Math So Far

$$x_1w_1 + x_2w_2 + x_3w_3 + b$$

Even Mathier

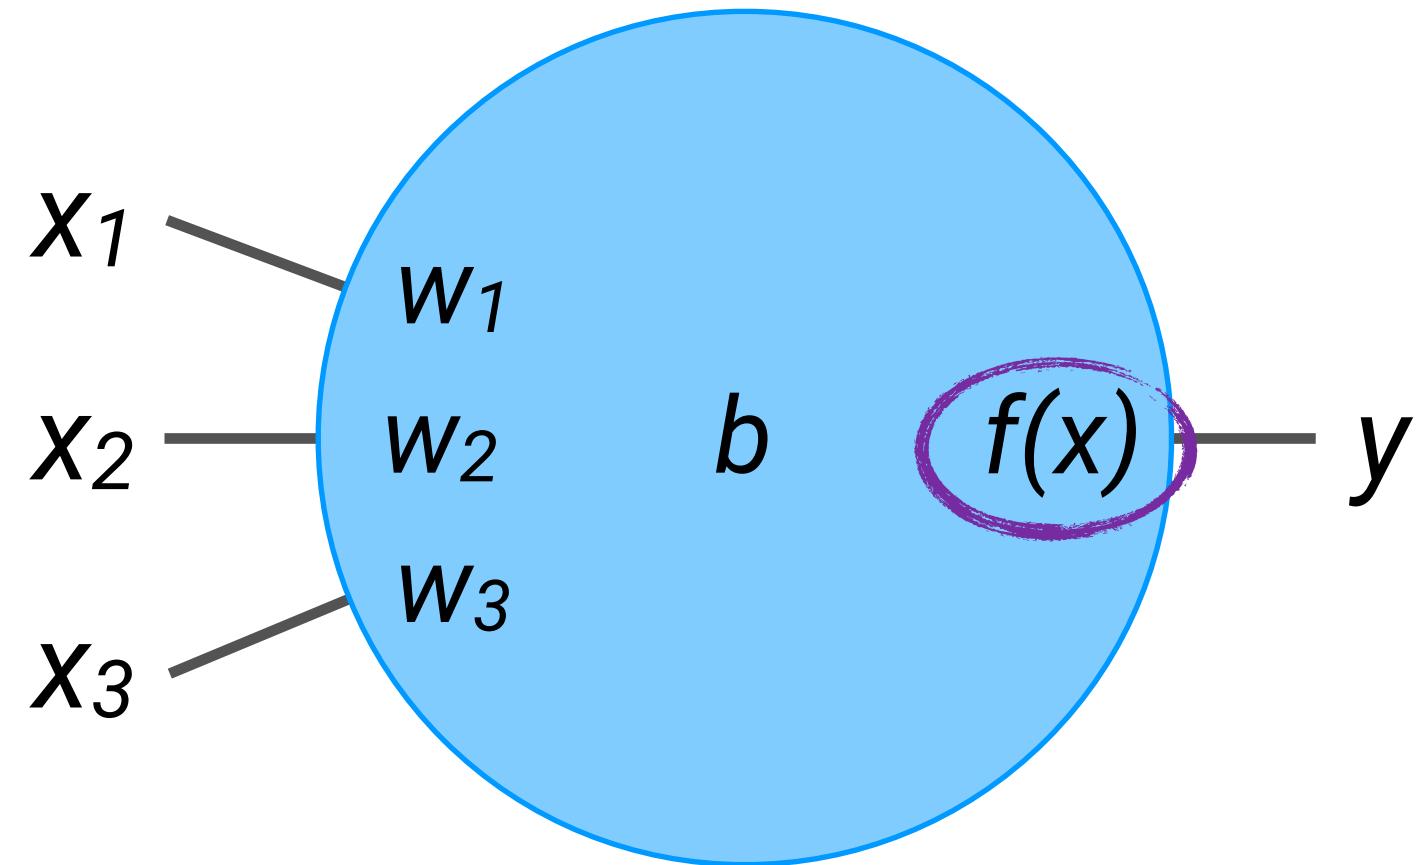

$$\sum_i x_i w_i + b$$

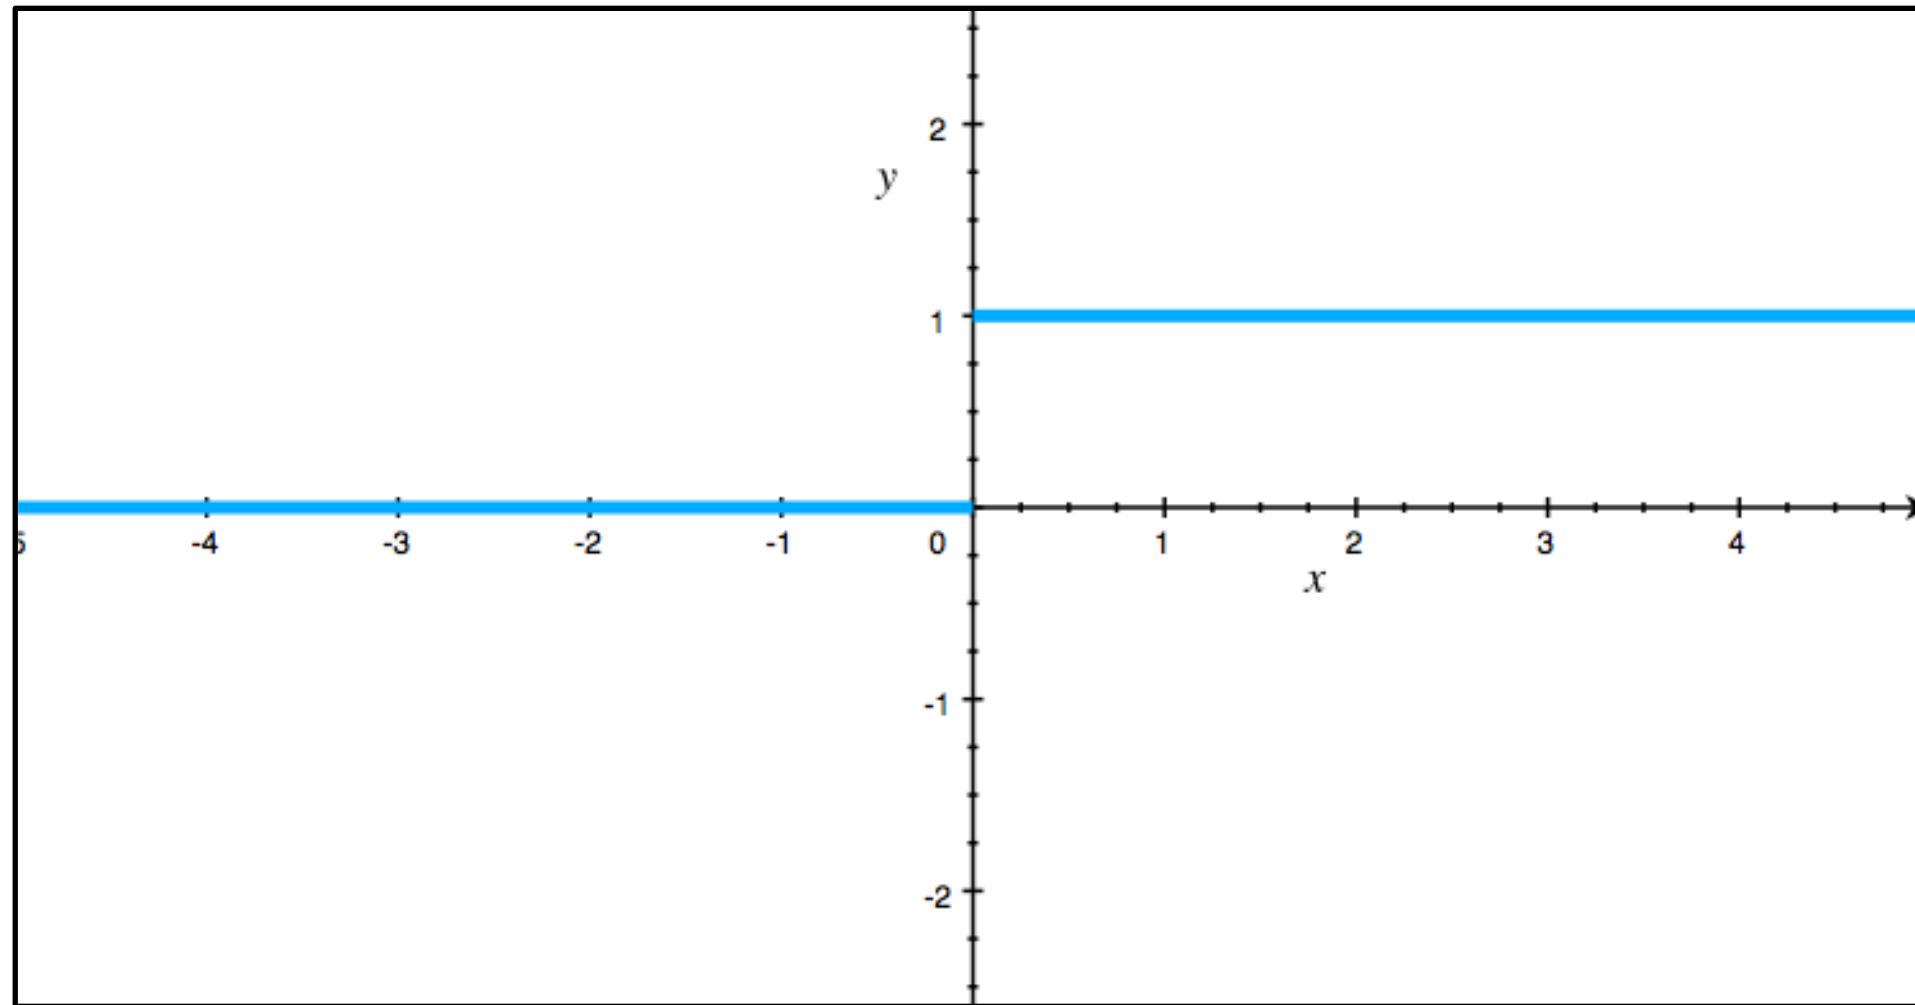

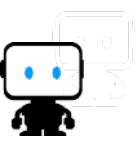

Activation Function

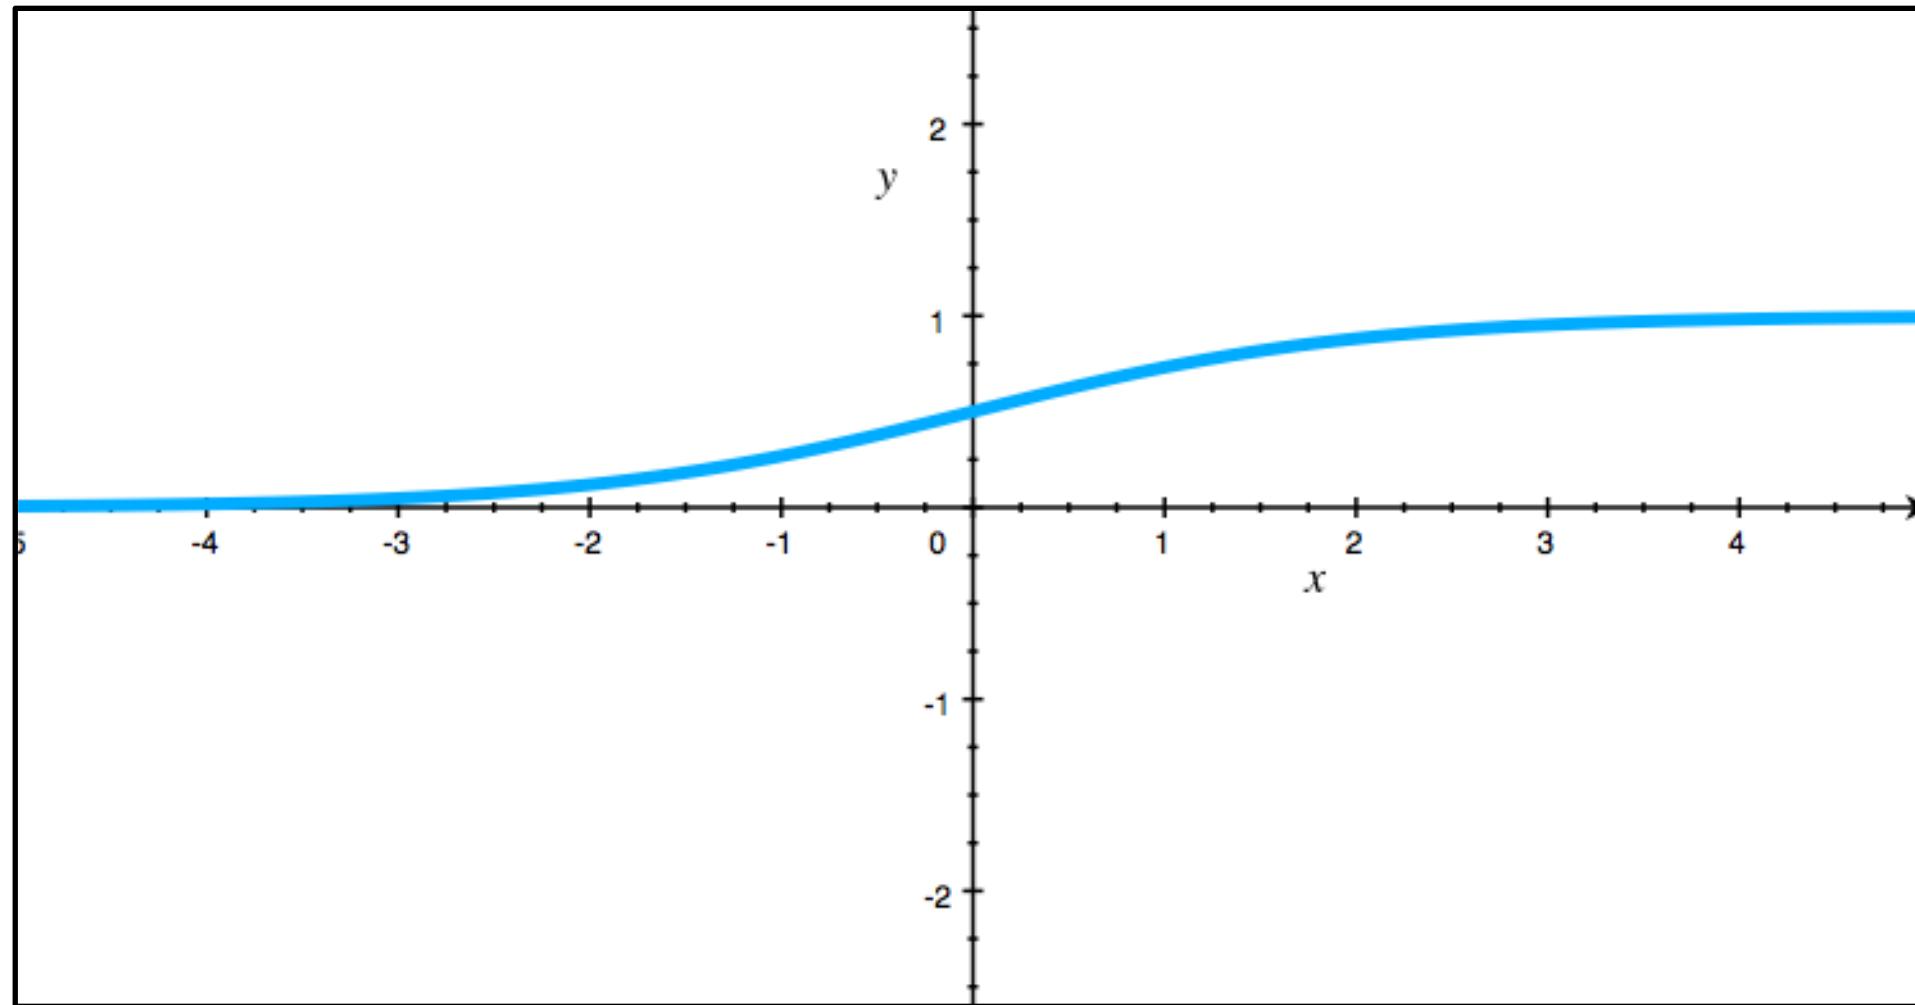

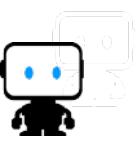

Adjusts the output of the neuron.

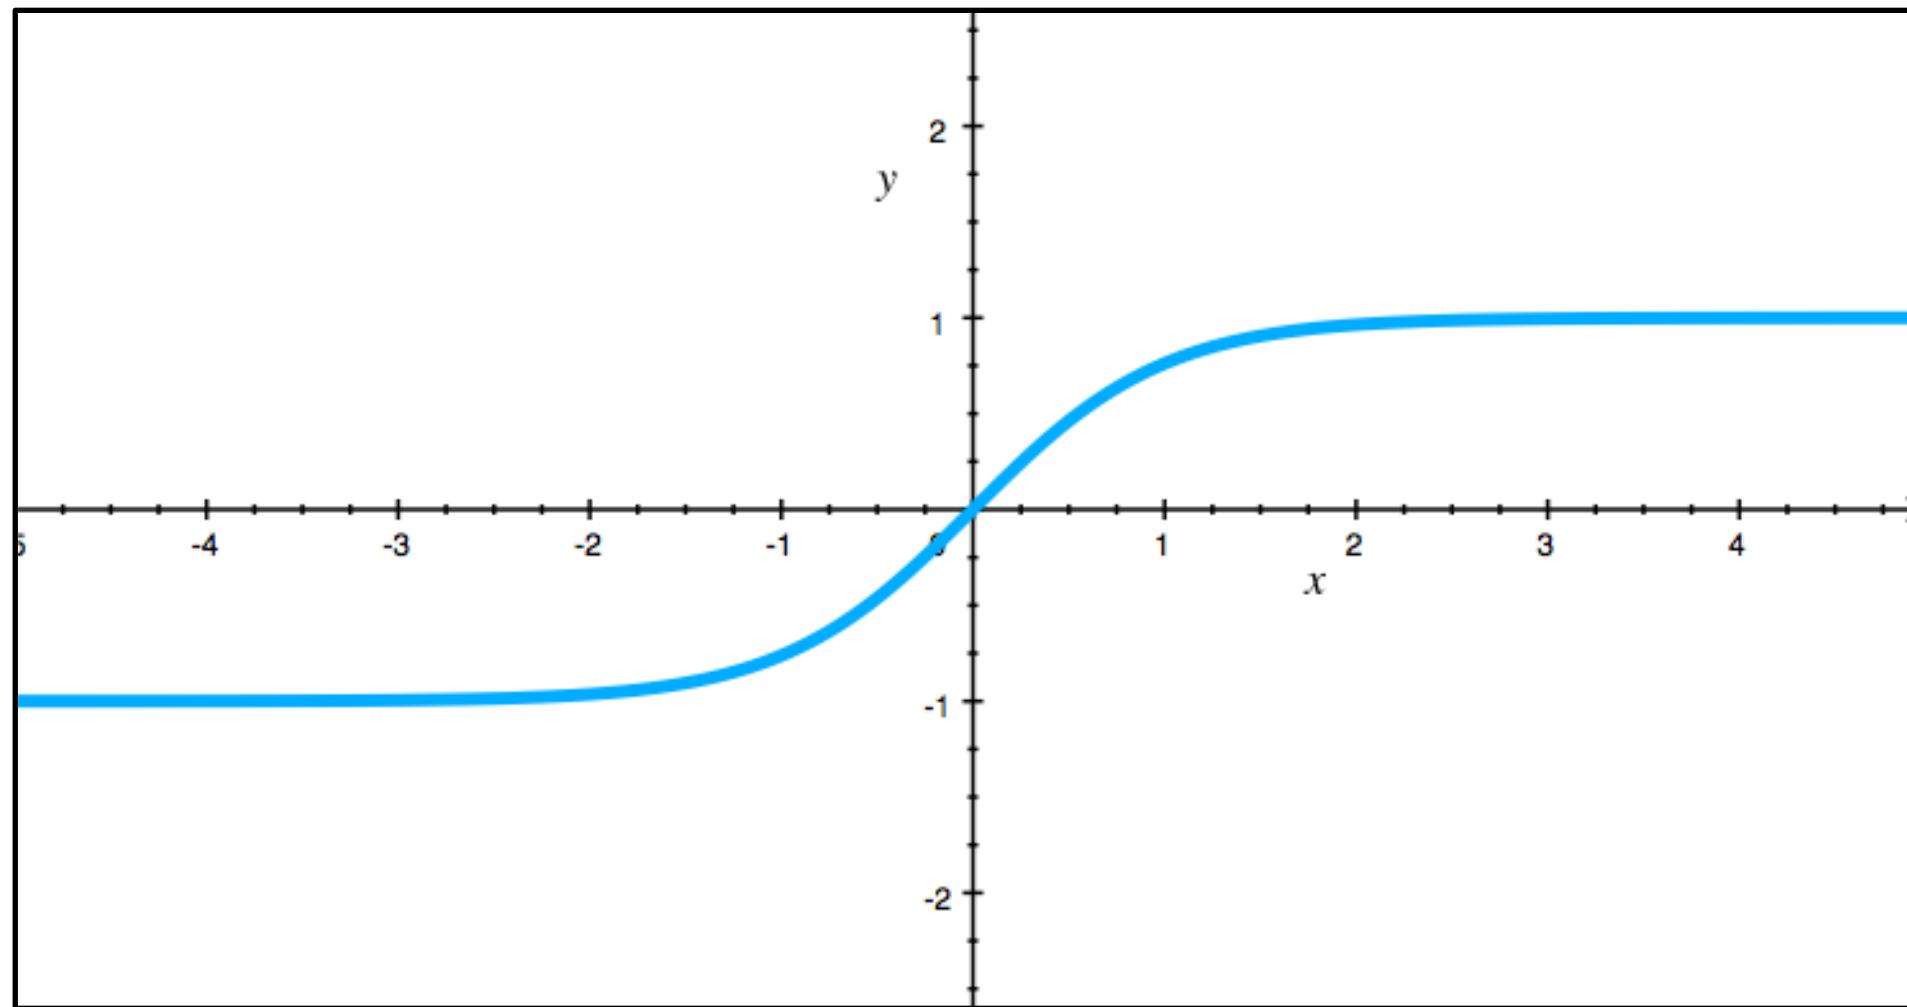

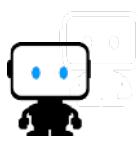

Step Function

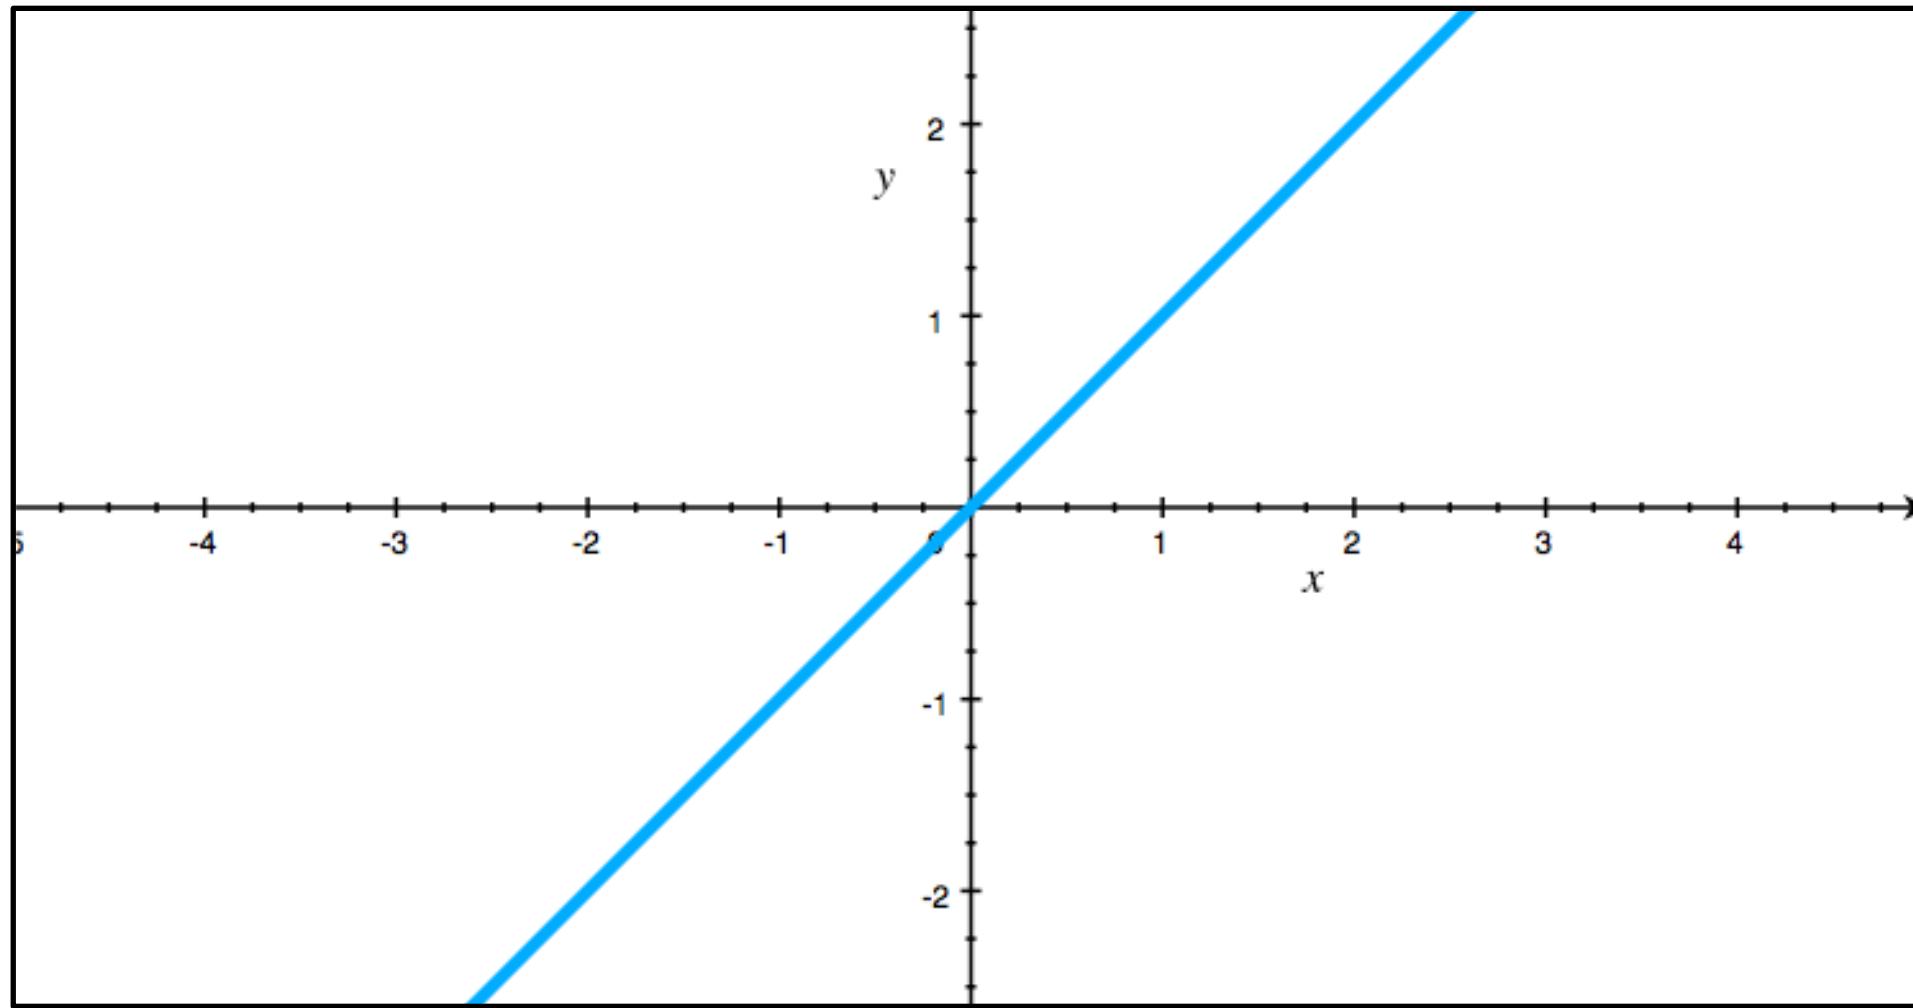

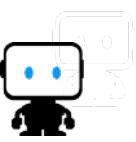

Sigmoid Function

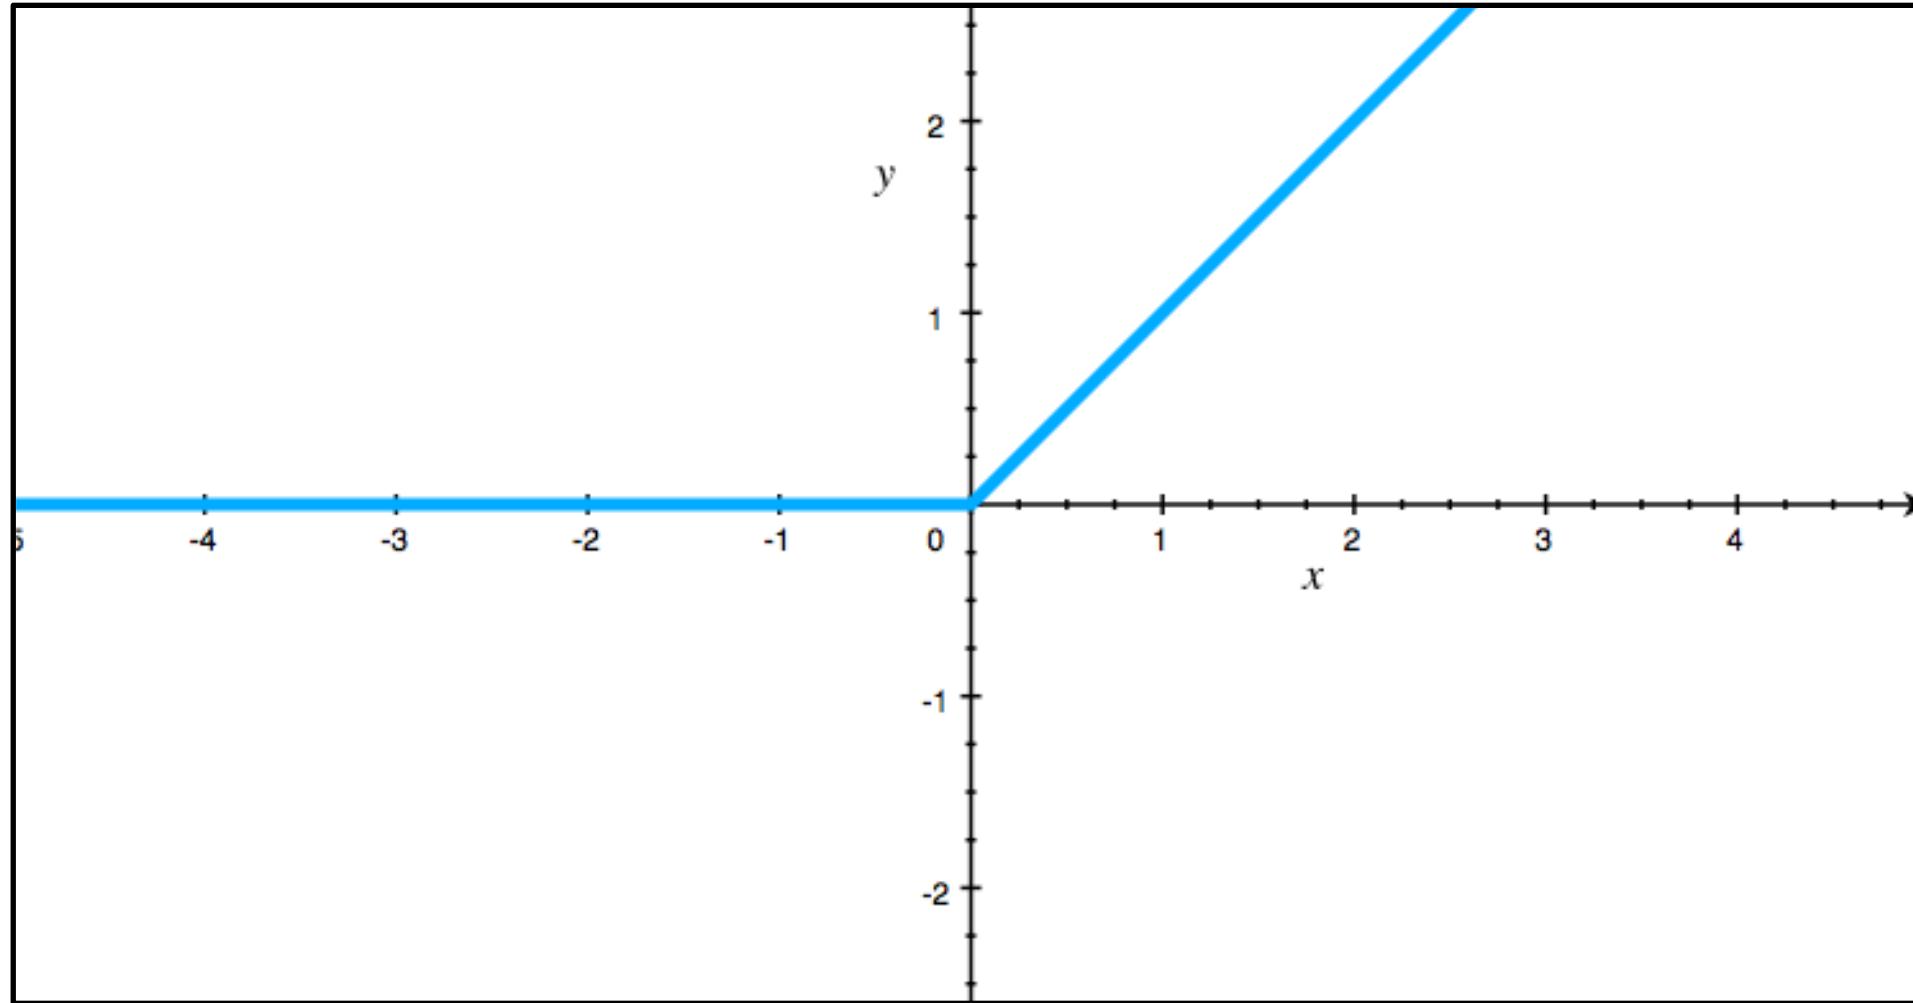

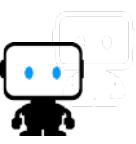

tanh Function

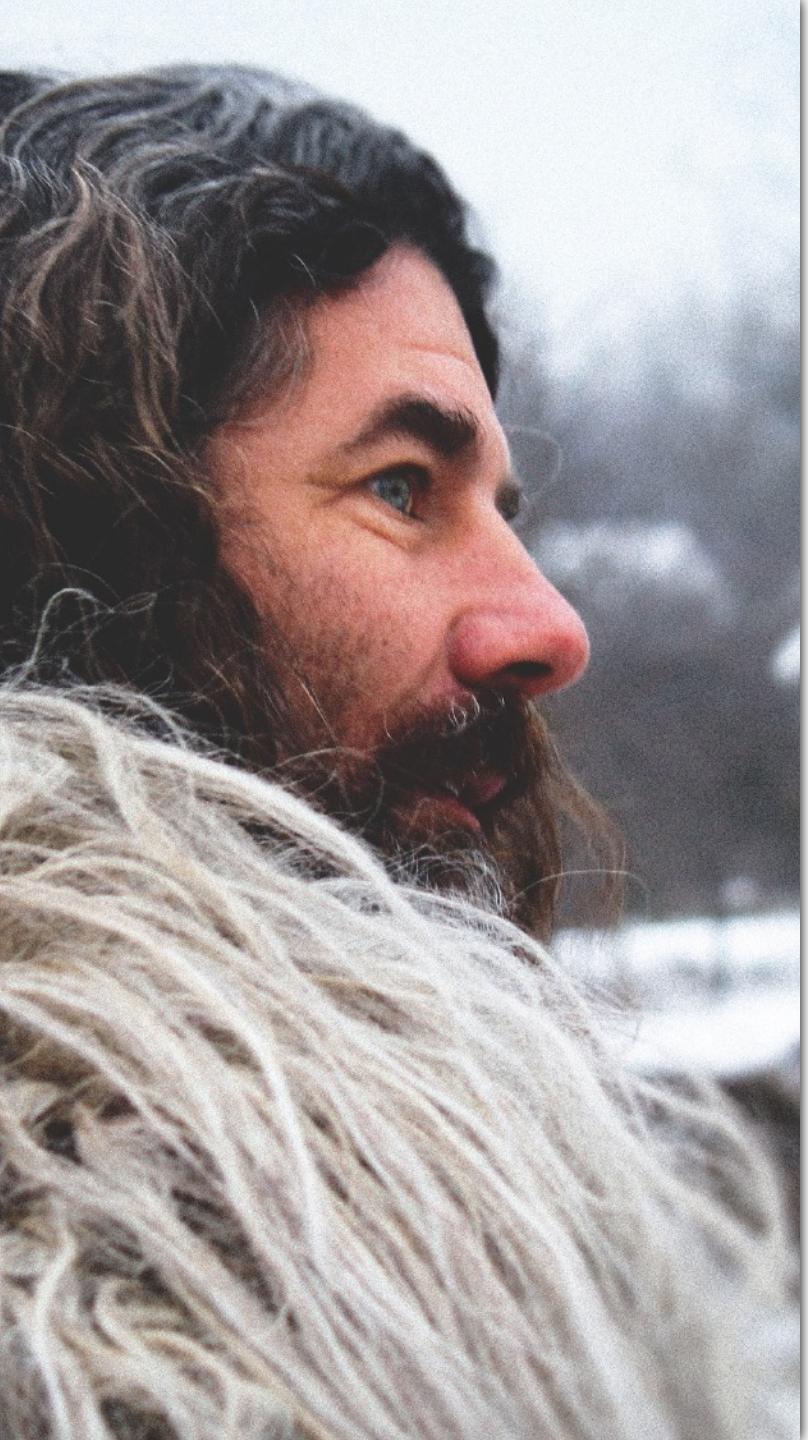

Linear Function

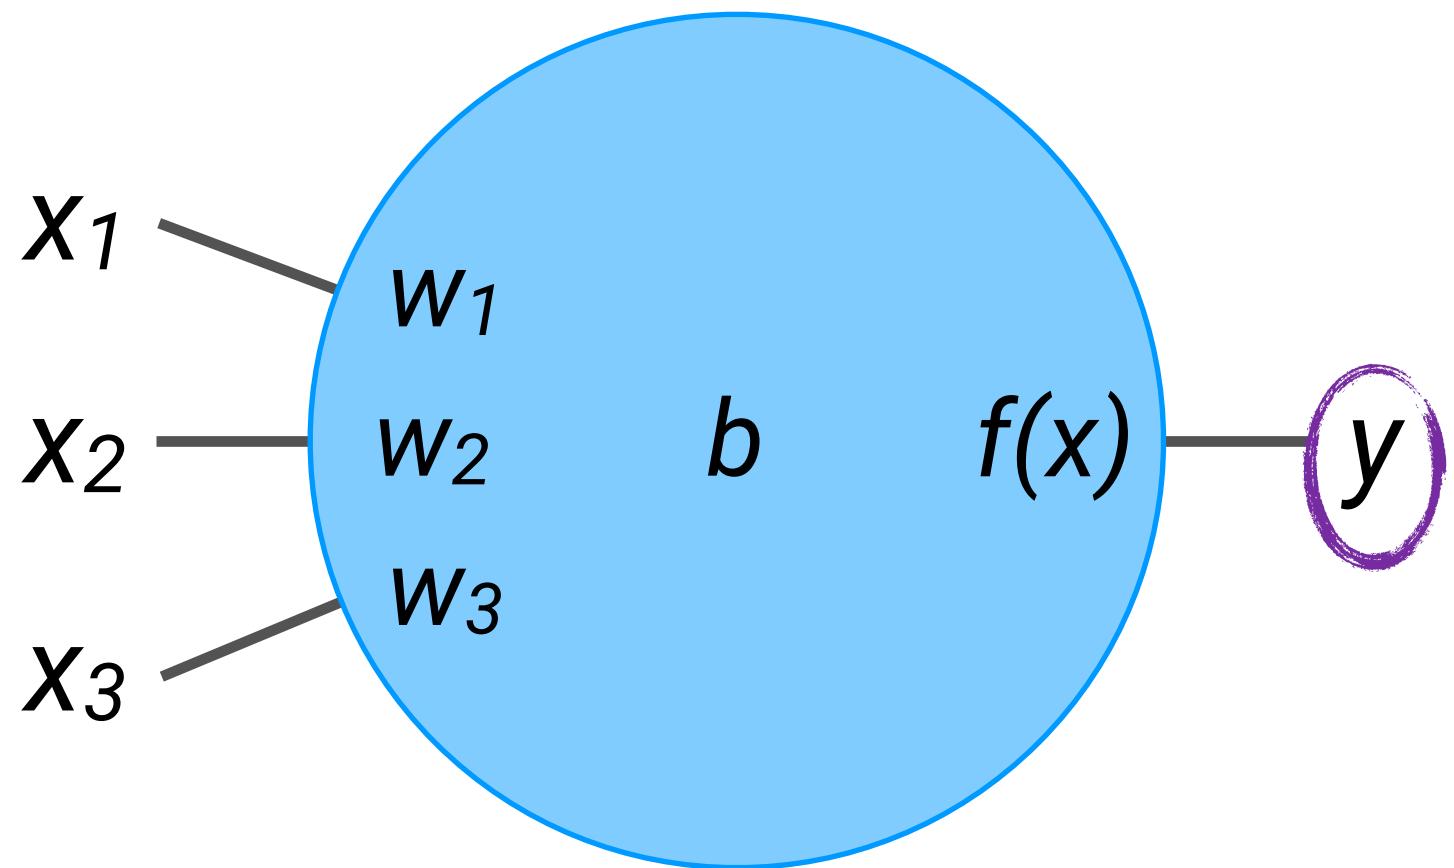

Rectified Linear Units (ReLU)

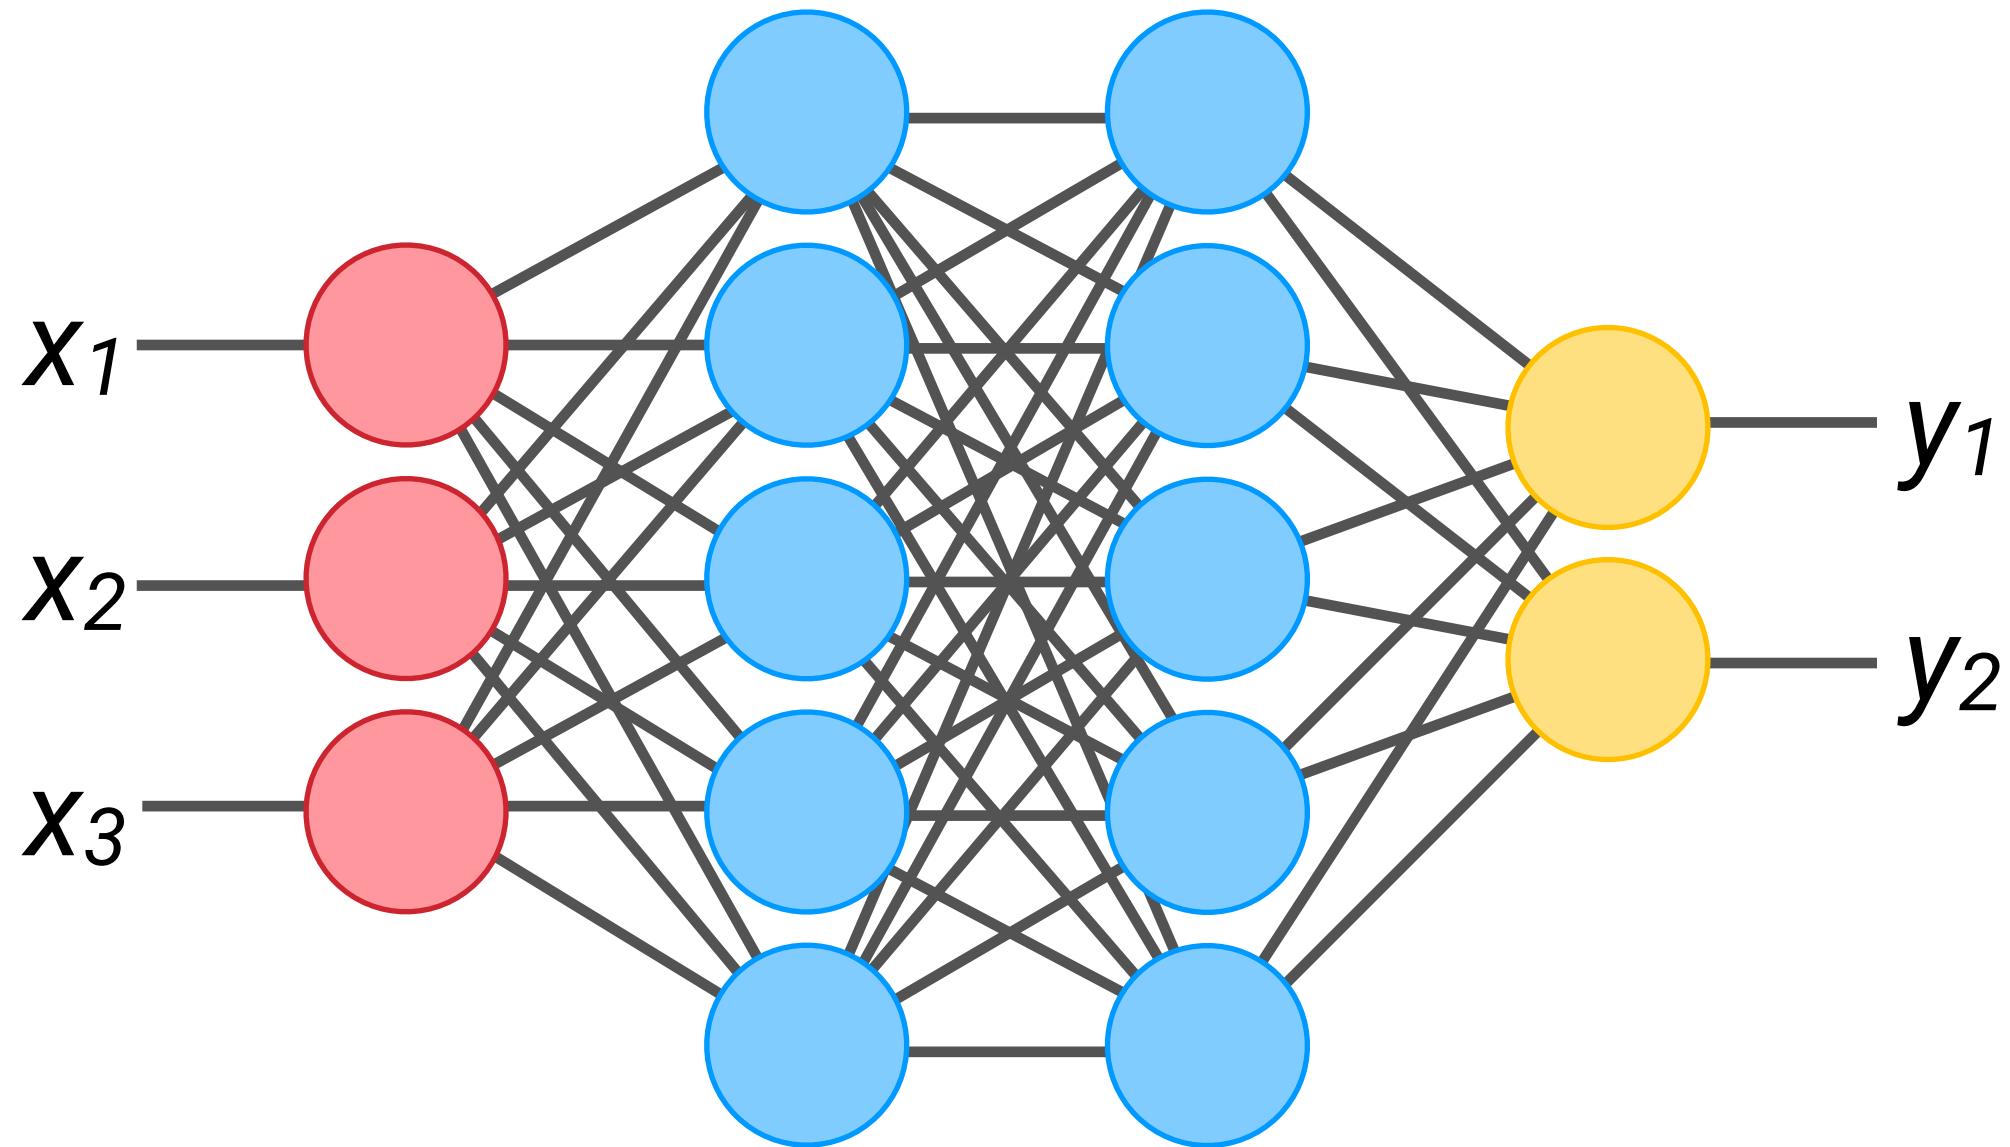

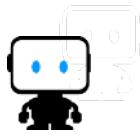

Output

The value leaving the neuron.

Neural Networks

```
# configure the neural network
model = Sequential()
model.add(Dense(128, input_shape=(1, 24, 24), activation='relu'))
model.add(Flatten())
model.add(Dense(16, activation='softmax'))

# compile the model
model.compile(loss='categorical_crossentropy', optimizer='adam', metrics=['accuracy'])

# train it
model.fit(X_train, Y_train, batch_size=32, epochs=20, verbose=1)
```
